

IMMORTAL

company profile

Key Note from CEO

Dear Valued Customers,

The effects of today's stressful lifestyle and environmental pollutants can be seen throughout the globe, in turn affecting our health and complexions.

Through a careful balance of science and natural resources and incorporating an appreciation of art and religion, Immortal introduces a range of World Class Cosmeceutical products at the leading edge of skincare today.

The Cosmeceutical concept ensures every customer has optimal skin treatment results for many skin problems. Following the cGMP standard and the latest scientific developments and innovations, we are presenting high quality product lines containing the world's best raw materials.

Immortal Co. Ltd offers you services for developing high quality products that meet your needs through our OEM, ODM and OBM systems. We also have the facilities to brand and package for international clients.

Warm regards,

IIT MINTARIO

CEO of Immortal

Immortal Cosmedika Indonesia

Immortal Cosmedika Indonesia is a contract manufacturer in cosmeceuticals with 11 years experience and a cGMP (current Good Manufacturing Practice) standard.

Company History

Immortal Cosmedika Indonesia Co. Ltd was founded on 27th December 1999. The company began as a small scale industry with a limited range of products, later expanding into product development and perfecting the management system.

After establishing, we did a very concise segmented market assessment and positioned ourselves within the specific medical cosmetic business. By 2004 we had fully established the company and, by 2008, we had built our international standard factory with cGMP certification. With this achievement, we ensured the quality, safety and hygiene of our products that have been admitted not only to countries in the ASEAN region, but also the outer ASEAN region.

Due to the consistency of our product's quality, client demand continues to grow, particularly with dermatologists who desire 'treatment' cosmetics. We realize that many skin problems can not be treated by cosmeceutical products alone and therefore launched Immortal Pharmaceutical Laboratories Co. Ltd (which also has a cGMP standard.)

Technology and production Method

Multi-color liquid powder method
Baked mineral powder method

Product Concept

Cosmeceuticals or Treatment Cosmetics

The most immortal's products was designed to have a specific 'therapeutic properties' and thats why it called a 'cosmeceuticals' or 'treatment cosmetics'. This resembled that the products is not a common cosmetic.

World Class Raw Materials in the Right Dosage

Our cosmeceuticals range is formulated from combination of world class raw materials in expert recommendation dose through controlled cGMP and ISO standard processes. These raw materials having various efficacy according to its property and had under-went several kind of testing ~ in vitro, ex vivo and in vivo. For sure, they are also having a good safety profiles revealed by several mandatory testing.

Less Preservative and ' Fresh from the Oven'

The formulation was designed to have its best stability under the smalest as possible as amount of preservatives. This is a must that those products delivered to the customers is 'fresh from the oven'and has fast turn over.

The Latest Biotechnology

As the technology was developed in conjunction to find the best efficacious effect of the actives, we are realize that our policy is to implement every useful invented technology to fulfils our valued clients and their customer's esteem need.

Good Manufacturing Practices

“Current Good Manufacturing Practices” or **“cGMP”** is an industry guideline particularly related to food, cosmetics, pharmaceutical products and medical devices. It operates to enhance quality and efficiency and for the safety of customers who use or consume the products and finally to represent safety in the workplace.

Inclusions in cGMP controls are physical factors (premises, machinery, tools, transportation, utilities, etc.), hygiene factors pertaining to employees and operational control factors including training and periodic cGMP implementation evaluations.

Immortal’s premises have cGMP certification:

- **HVAC** (Heating Ventilating Air Conditioning) system which guarantees temperature, humidity, low particle size and air circulation according to WHO standard.
- Water treatment system with Double step **RO** (Reverse Osmosis) and **EDI** (Electro deionization) method according to USP 29 producing an ultra-purified water (pharmaceutical grade).

Quality Assurance

The Proper Equipment and Exquisite Manufacturing Technology

A combination in harmony of skillful manpower, premium quality of world class raw material, advanced manufacturing equipment and processing methode, we supply a high-quality cosmeceutical products to fulfills our esteem client's needs.

Our Services

At Immortal we are committed to the production of consistently high quality products.

We provide several services available for both big and small orders under mutual terms and conditions:

- Patent of trademark (for Indonesia only).
- Food and Drug Association product registration (for Indonesia only).
- Brand logo design.
- New formulation development.
- Reformulation of existing products.
- Supplying and printing of containers.
- OEM, ODM, and OBM

OEM (Original Equipment Manufacturer)

We manufacture products or components that are purchased by a company and retailed under the purchasing company's brand name.

ODM (Original Design and Development Manufacturer)

We design and manufacture products which are specified and eventually branded by another company for sale. Such companies allow the brand company to produce without having to engage in the organization or running of a factory.

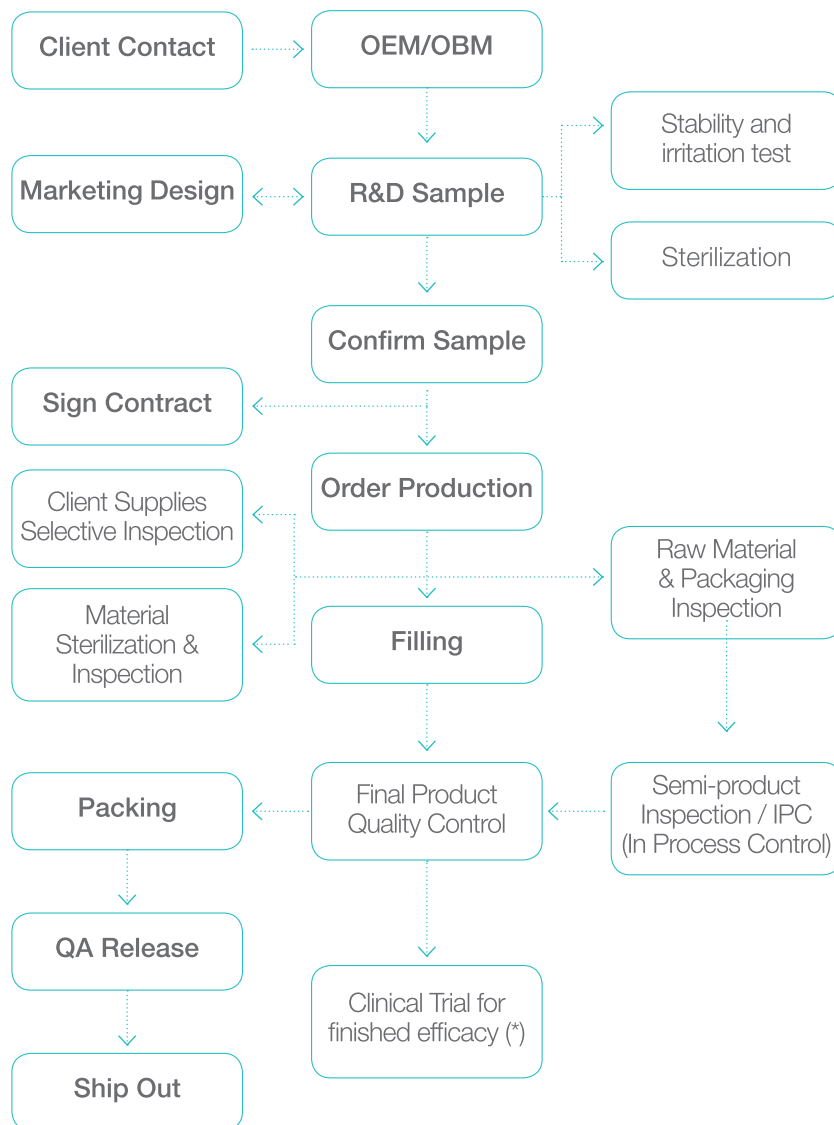

OBM (Original Brand Manufacturer)

Another company sells an entire product made by our company or including a component thereof from our company sources as our branded product, they add a virtual extrinsic value to the product and then sell our products in their country as a distributor.

There are currently 80 trademarks owned by us such as Immortal®, Aphroderma®, Pulvushydro®, Hydrodetox®, Tenera®, Repara®, Dr.Refina®, Sherline®, and other company's trademarks. Many of our products are recommended by dermatologists.

At Immortal we will transform your ideas into reality
